STATEMENT

In January 2017 I became Co-Chair of the Women’s Constituent Partner’s Group of GAP, and I am seeking to be reelected.

Teresa Boccia and I work as a team, we have increased by 32% the number of members adding 133 more women.

We have done an intense work of:

- **Virtual participatory collaboration** keeping the group informed and participating, proposing content for reflection at high level meetings.
- **Development and implementation of the group’s work program** for the short, medium and long term. Goals are: 1) to strengthen the movements of women, to access knowledge and participation, in an informed manner, in the process of monitoring the NUA and the UN Global Agenda (Sendai, Paris, Addis Ababa, SDGs), 2) ensure that gender and diverse women are included in the implementation of these agendas, 3) have a system of minimum indicators of inequality gaps to monitor the evolution of women's substantive equality.
- **Participatory research** with surveys about knowledge, needs and accomplishments of the group.
- **Inclusive communications and documentation**, in English and Spanish.

We initiated the:

- **Virtual training in public policies**.
- **Virtual meetings of reflections and comparative analysis**, with timely indicators on gender gaps in regions and countries.
- **Alliances** with other global women's networks.

I commit to increase the membership according to the mission of GAP; lead dialogues to incorporate the human rights of women in politics; accelerate their substantive equality to achieve SDGs and advocate for their recognition as transformative agent in the implementation of NUA.
